

# From Data Tracing to Value Creation in First Industrial Applications

The 13<sup>th</sup> GIO Roundtable, Barcelona Feb 27<sup>th</sup> 2024

Prof. Dr. Juergen Grotepass, CSO Manufacturing Europe  
Huawei Technologies Duesseldorf GmbH

ZVEI Working Group “AI in Automation”

# Value Creation Trends triggered by 2030 Vision for Industry 4.0 +

- ❖ Rise of Data Spaces for data sharing 2020-2024:
  - Advanced Systems Engineering for Value Creation
  - Creation and Operation of New Market Places, Data Spaces & Services

- ❖ Rise of AI to support Value Creation 2024:
  - Interactive Human-Machine Dialogue (chatGPT)
  - Generative AI for consumer & automotive industry
  - Risk Based Regulation of AI (AI Act)

# Data Spaces Evolving

	 <b>Catena-X</b> <span>LIVE</span>	 <b>energy data-X</b>	 <b>Health-X dataLOFT</b>	 <b>Mobility Data Space</b> <span>LIVE</span>

# Contents

- 1. Key Use Cases of Value Generation Based on Data Sharing**
2. Digital Product Passport and Battery Passport
3. Generative AI Developments for Manufacturing and Automotive

# Digital Product Passport 4.0 (DPP4.0) – AAS for CO2 Tracing of Products

ZVEI Demonstrator showcases data tracing in supply chain of highly integrated products at Digitalkonferenz, Hannoverfair 2024, SPS/IPC drives in Nueremberg

## Overall PCF Value summed up over all individual PCF values based on Asset Administration Shells

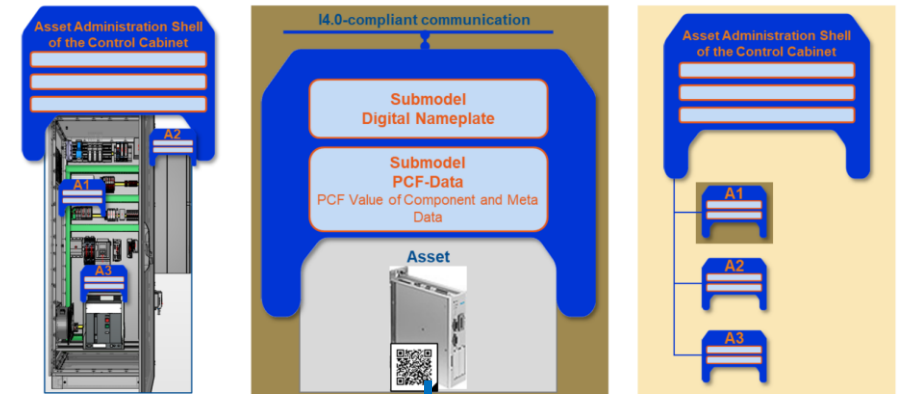

Figure 9: Asset Administration Shells of the control cabinet and the integrated products

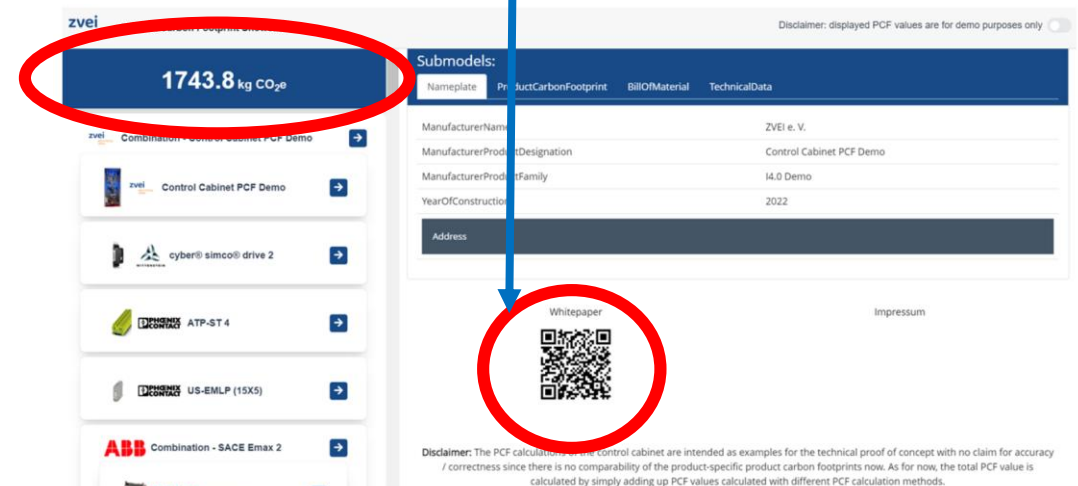

Figure 12: Dashboard for the ZVEI-Show-Case PCF@Control Cabinet

# Sustainable Shared Production – AAS for CO2 Tracing in Manufacturing

smartFactory<sup>KL</sup>

Truck	0 Wh
Semitrailer_Truck	8.96 Wh
Cab	122.33 Wh
Windshield	62.49 Wh
Cab_Chassis	0 Wh
Semitrailer	3.63 Wh
Trailer_Body	462.7 Wh
Semitrailer_Chassis	0 Wh

## Key Innovations:

- User Configuration of Product Design / Requirements
- Manufacturing Capabilities are described as AAS in Marketplace
- Sustainable “Manufacturing as a Service” Use Case of Shared Production

➔ Follow-Up as BMWK funded R&D Project: “TWIN4Trucks”

# Manufacturing as a Service as Catena-X Use Case

DPP as Building Block in Market places: # Resilience of supply chains and # sustainability

## Paradigm Shift

### BUYER VIEW

MaaS opens the world for flexible production

- Unleash limitation to your own equipment
- Unleash limitation to your resources
- Unleash limitation to one location
- Unleash limitation to fixed partners

Manufacturing as a Service

Own production

### SUPPLIER VIEW

MaaS generates new market opportunities

- Offering free capacities in an open market place
- Close gaps with available resources

Machine 1  
Machine 2  
Machine 3

Free capacities for  
new orders

3. Generative AI Developments for Manufacturing and Automotive

# DPP within newest GARTNER Hype Cycle for Sustainability 2023 Analysed as an "Innovation Trigger"

## Digital Product Passport 4.0

**Gartner**

Figure 1: Hype Cycle for Sustainability, 2023

### Hype Cycle for Environmental Sustainability, 2023

# Why we need a Digital Product Passport

Maximize  
Product Transparency

Fulfill  
Regulatory Compliance

Improve  
Circularity Potential

## How Catena-X supports Digital Product Passes

Standardized data model that specifies the content of a passport

Infrastructure for providing and consuming data

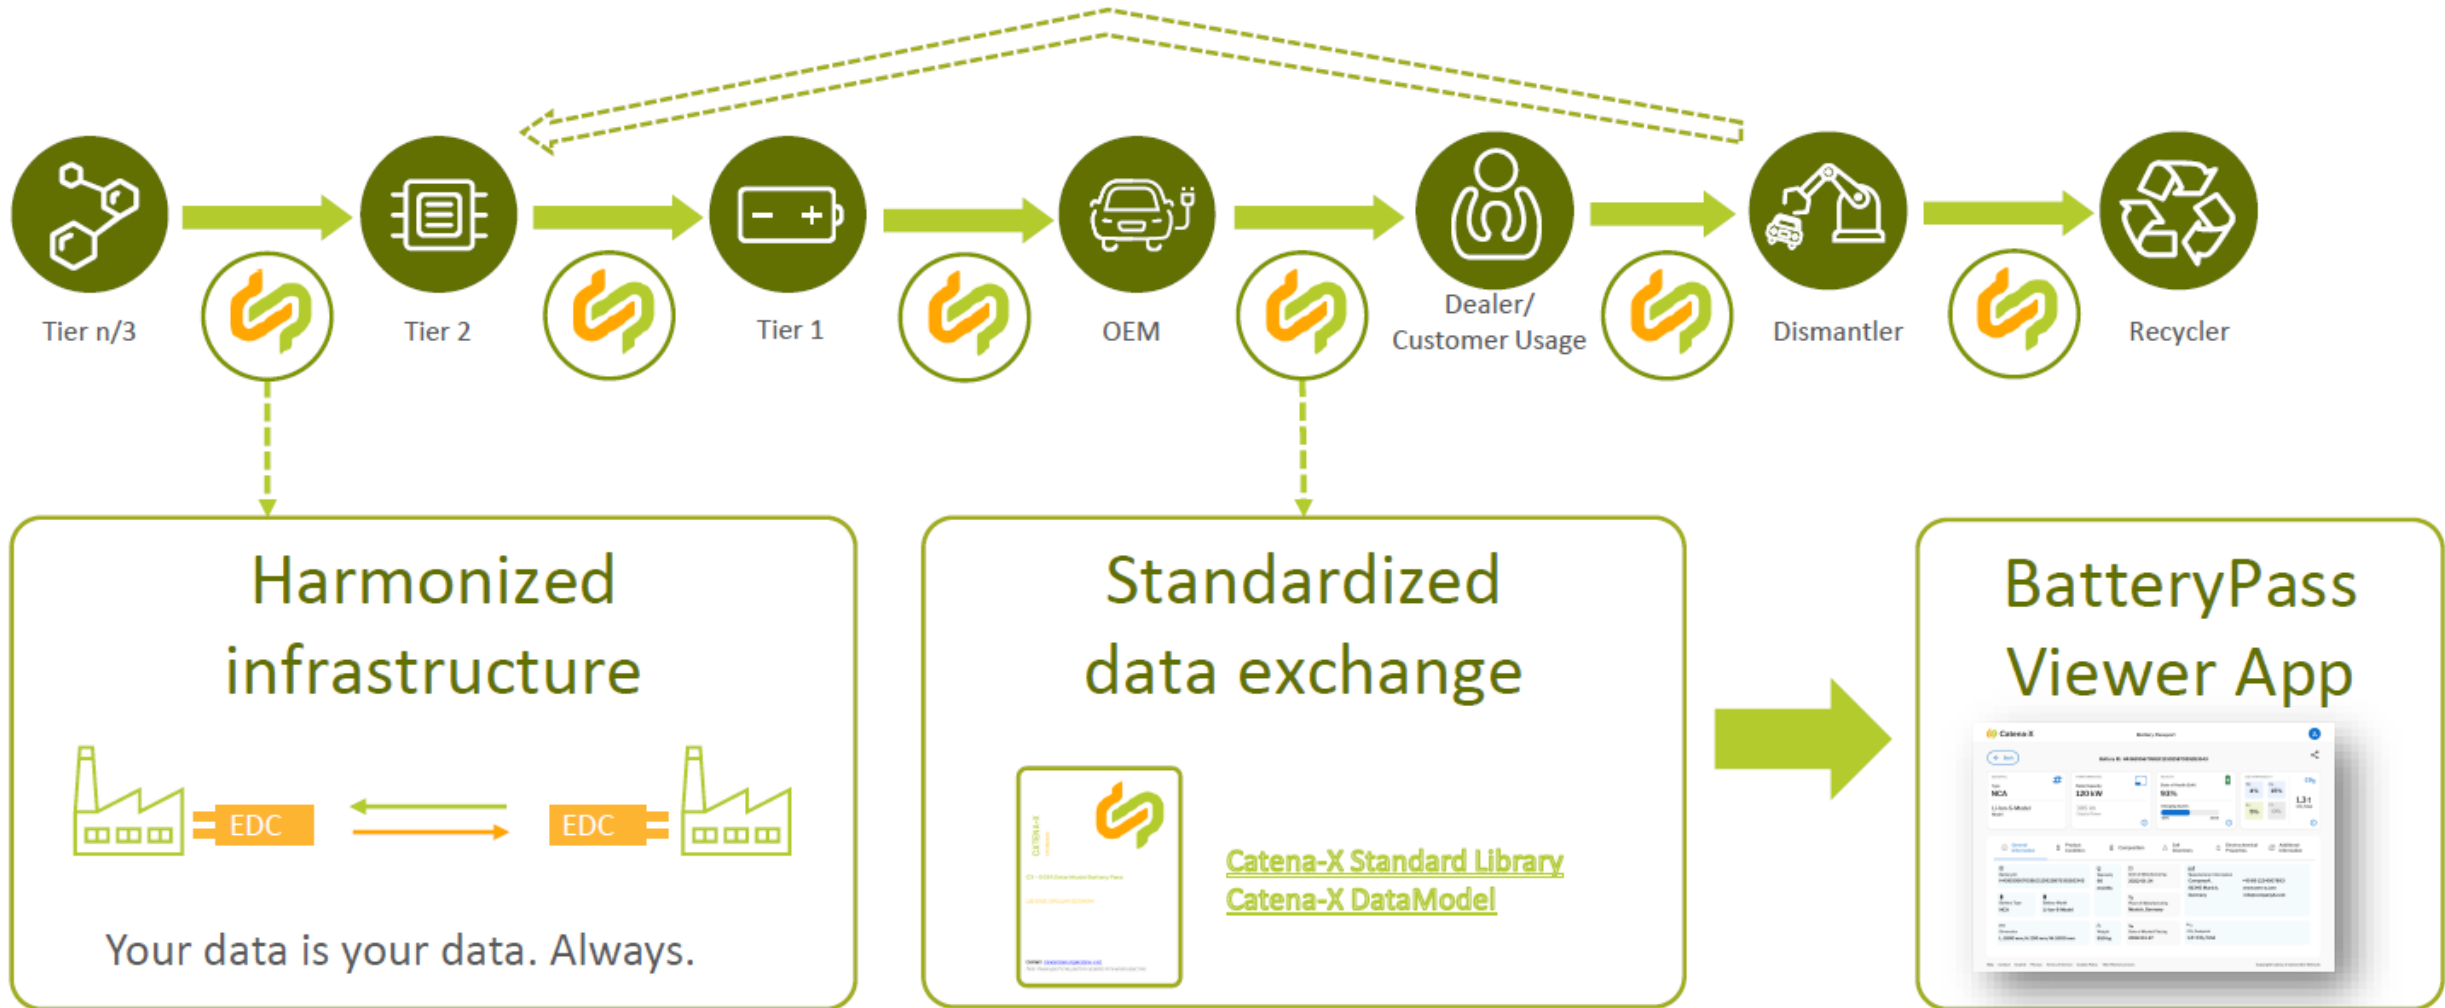

Application for accessing and viewing the passport

Started with a “Battery Passport”

# Value Derivation in the trusted Catena-X data space

# Contents

1. Key Use Cases of Value Generation Based on Data Sharing
2. Digital Product Passport and Battery Passport
3. **Generative AI Developments for Manufacturing and Automotive**

# Taxonomy of AI related Disciplines

Generative artificial intelligence (GenAI) tools are an **emerging class of new-age artificial intelligence** algorithms capable of producing **novel content** — in varied formats such as text, audio, video, pictures, and code — based on user prompts.

Recent advances in machine learning (ML), massive datasets, and substantial increases in computing power have propelled such tools **to human-level performance** on academic and professional benchmarks.

**Industry developments include generated code for PLC programming (Siemens & Microsoft at Hannover Fair 2023) and 3d Printing of robot grippers**

# Automotive Solutions at CES (consumer technology association Jan 2024)

ChatGPT based driver assistant with interactive dialog function

# Generative AI Added Value in Industry

Bing Image Creator powered by Dall-E! : AI has generated a picture for OPC UA-Communication from Edge to Cloud with Lego

**Use Case 1: Product Design Optimization - Influence of Generative AI and LLMs on AR/VR and 3D Printing**

**Use Case 2: Quality Control and Inspection - Influence of Generative AI and LLMs on AR/VR and Computer Vision**

**Use Case 3: Robotic Process Automation (RPA) - Influence of Generative AI and LLMs on RPA and Intelligent Robotics**

**Use Case 4: Industrial Internet of Things (IIoT) and Data Analytics - Influence of Generative AI and LLMs on IIoT and Data Analysis**

**Use Case 5: Cybersecurity and Threat Detection - Influence of Generative AI and LLMs on Cybersecurity**

**Use Case 6: Cloud Computing for Scalability and Collaboration - Influence of Generative AI and LLMs on Cloud Computing**

# Generative AI Added Value in Industry

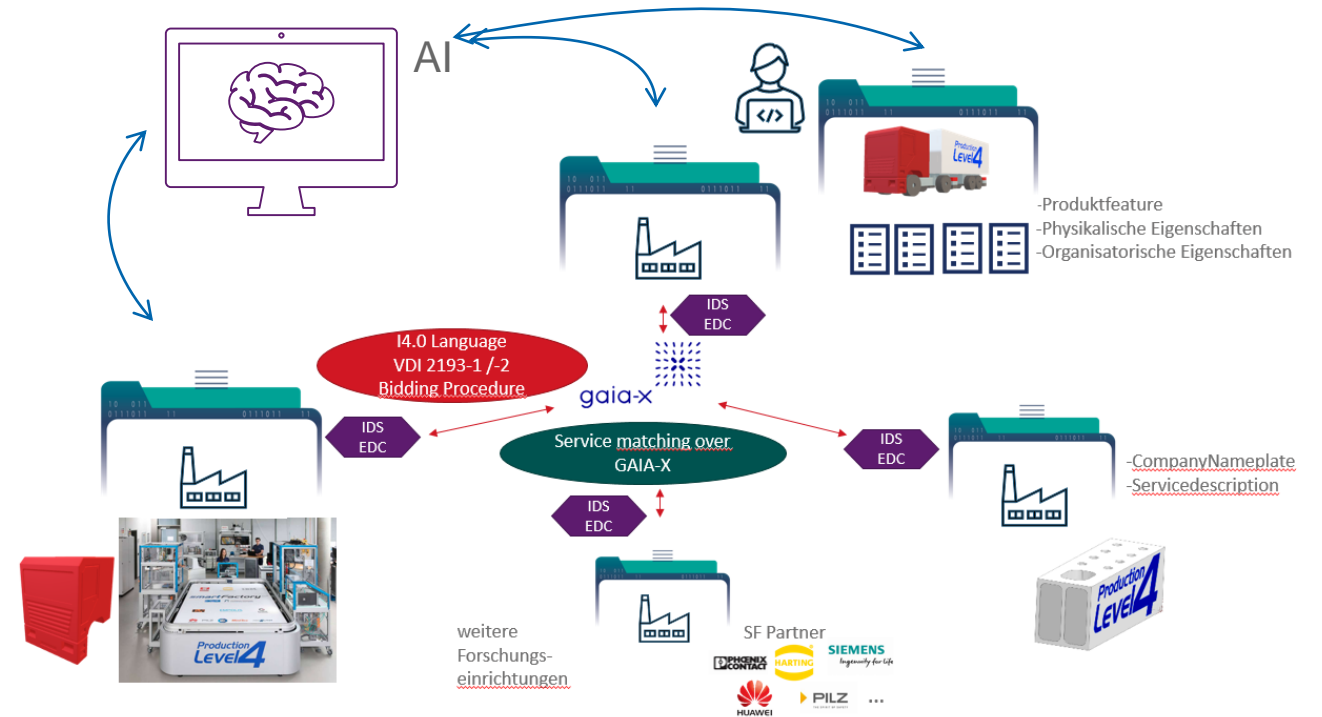

AI's potential impact on the global economy, \$ trillion

<sup>1</sup>Updated use case estimates from "Notes from the AI frontier: Applications and value of deep learning," McKinsey Global Institute, April 17, 2018.

# AI supported Engineering in Manufacturing - Connecting Skills via AAS

Using IDS / EDC - Eclipse Dataspace connector for GAIA-X compliant value generation in shared production  
 AI to support skill evaluation, partner matchmaking, automated auction & contracting

# Outlook on Generative AI supporting MaaS in Marketplaces

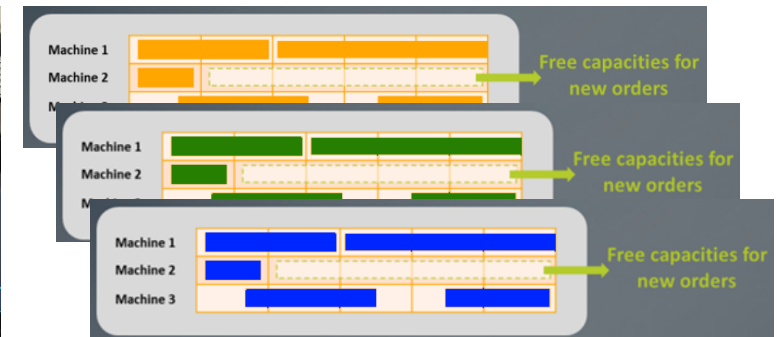

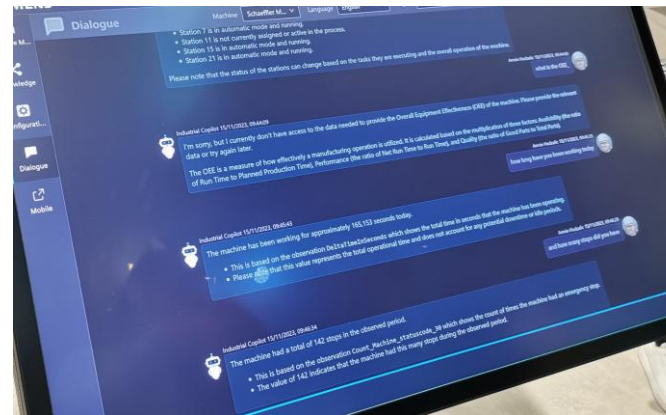

## BUYER VIEW

MaaS opens the world for flexible production

## SUPPLIER VIEW

MaaS generates new market opportunities

Please analyze supply-chain in Catena-X data space and help to configure best matching partners for the smallest PCF footprint in end-to-end battery cells production

Service provider	CO2 footprint	Energy consumption	Localization	Price	Delivery time
